

Ego Psychology And Mental Disorder: A Developmental Approach To Psychopathology

Type	Treats	Side-Effects
Prefrontal lobotomy (severs nerve fibres connecting frontal lobes to diencephalon)	Schizophrenia. Particularly successful because present functioning areas are disconnected from memories and from future concerns.	Inability to plan ahead, indifference to the opinions of others, child-like actions, intellectual and emotional flatness.
Biomedial Leucotomy	Depression, Obsessive-Compulsive Disorder	Death, serious personality changes
Orbital Leucotomy	Depression, Obsessive-Compulsive Disorder, Extreme Anxiety.	Death, serious personality changes
Bilateral Leucotomy	Severe Depression	Epileptic Fits.
Limbic Leucotomy	Abnormal Agression.	Controversial because patient isn't suffering, we just like their behaviour.
